

Mirlan Nurbekov

Software Engineer

I am a highly skilled software engineer with about 8 years of experience working in dynamic, international environments. I specialize in designing, building, and optimizing robust, scalable systems that support business-critical operations. I have a proven ability to manage demanding schedules, handle critical administrative responsibilities, and foster clear communication across multicultural teams. My strengths lie in delivering reliable technical solutions, adapting quickly to new challenges, and contributing meaningfully to both team and organizational success.
